**Subject: SBE, Inc. Compliance with REACH**

REACH is a new European Community Regulation (EC 1907/2006) on chemicals and their safe use enacted June 1, 2007. It deals with the **R**egistration, **E**valuation, **A**uthorization and **R**estriction of **C**hemical substances. SBE, Inc. supports the basic aim of REACH in improving the protection of human health and the environment.

As defined in REACH Article 3(3), SBE, Inc.'s products are "articles" and do not release any substances under their normal intended use. Under REACH, suppliers of articles must provide recipients with information on Substances of Very High Concern (SVHC) if those are present above a concentration limit of 0.1 % on a per article level.

Based on available MSDS data, SBE, Inc. herein certifies that none of the materials which are used in its products contain any of the currently listed SVHCs. This is inclusive of Standard line, Power Ring™, and special order parts with the exception of customer supplied components, the compliance for which the customer is solely responsible. This certification covers products from 8/1/2005 (date code 0531) forward. Compliance of earlier date codes can be determined on a case by case basis.

SBE, Inc. meets all applicable REACH requirements and is committed to provide our customers with information about the materials in its products as required. SBE, Inc. will continue to monitor SVHC Candidate List as it gets revised and provide updates to this declaration as applicable.

This certification statement applies only to REACH regulations; materials of concern under other regulations are addressed under separate documents.

Thank you,

**SBE, Inc.**
