July 1, 2005

To: Our valued customers
Subject: Certification of Compliance to the EU Directive 2002/95/EC (RoHS)

SBE, Inc. is providing this certification with regards to our commitment to supply components free of specific hazardous substances in support of the RoHS Directive. This certification pertains to all *standard* catalog products manufactured by SBE (please see the Products/Specs section of our web site for a listing of these product series), **EXCEPT** for those listed below. This certification does **NOT** apply to the following series:

192P Pacer® series
288P & 298P RC Networks
770P series

All customer specific product/part numbers (product types not listed on our web site and those part numbers that have been assigned a unique part number), will need to be considered for certification individually, when requested.

All standard catalog product manufactured by SBE, Inc. after 8/1/2005 (except those listed above) will meet the *currently* defined Directive. Traceability and verification will be accomplished via the date code marked on the units. All units except those listed above, with a date code of 0531 (31st week of 2005) and beyond will be certified as meeting the Directive.

Any unit that is unmarked, has no date code stamped on it, or has a date code of 0530 or before will not be certified.

In some cases purchase orders may be filled partially, or completely, from our finished stock inventory. As a result, it is the customer's responsibility to indicate on their purchase order if a product is required to be certified to the RoHS Directive. In such cases, delivery time and price may be impacted by a requirement to certify a complete order. Please contact us to discuss your specific requirements.

Thank you.

SBE, Inc.
SB Electronics

Performance.
